Composites Science and Technology **28** (1987) 318–319

SUBJECT INDEX TO VOLUME 28

Acoustic emission, 254
Adhesion (fibre/matrix), 129
Anisotropic failure criteria, 269
Antisymmetric laminates, 231
Approximate elastic design, 62
Axial crushing (composites), 211

Bending
  beams, 231
  hybrid beams, 294
Bond strength, 17
Buckling, 33

Carbon fibre composites, 57
Carbon/epoxy, 1
Carbon/PEEK, 1
Compliance technique, 3
Composite
  beam theory, 231
  cones (crushing), 211
Cox model, 47
Crack
  growth, 1
  layer theory, 11
  propagation, 193, 199
  velocity, 199
Crush zone morphology, 223
Crushing (GRP cones), 211

Damage
  development (fatigue), 151
  in composites, 103
Damping loss, 180
Delamination, 1, 33
Design with laminates, 57

Effective properties, 114
Elastic
  design, 60
  modulus measurement, 173
Elastic–plastic sandwich, 311

Failure
  criteria, 37, 88, 269
  mechanisms, 151
Fibre
  failure, 88
  length distribution, 48
  orientation, 46
  pull-out, 18
Fibre/matrix interface, 137
Finite element analysis, 254
Flexural
  behaviour, 291
  fatigue (GRP), 137
Fractography, 151, 201
Frequency dependence (modulus), 181

Glass-fibre/polypropylene, 45

Hybrid composites, 291
Hydrostatic stress, 274

Composites Science and Technology (**28**) (1987)—© Elsevier Applied Science Publishers Ltd, England, 1987. Printed in Great Britain

Composites Science and Technology **28** (1987) 318–319

Glass-fibre/polypropylene, 45

Hybrid composites, 291
Hydrostatic stress, 274

Composites Science and Technology (**28**) (1987)—© Elsevier Applied Science Publishers Ltd, England, 1987. Printed in Great Britain

Imperfect bonding, 103
Interfacial shear
  strength, 17
  stress, 45
Interlaminar cracks, 1
Iosipescu shear test, 251

Kevlar/epoxy bond, 30

Latex systems, 129

Matrix
  cracking, 154
  failure, 89
  toughness, 193
  web fracture, 205
Maximum stress criterion, 272
Microbond method, 17
Mirror zone, 208
Mixed-mode failure, 35

Nylon cord/elastomer, 129

Particulate composites, 119
PEEK, 1, 36
Progressive failure, 87
Pull-out
  fasteners, 279
  fibre, 18

Rate effects (fracture), 7
Rayon cord/elastomer, 129
Resonance measurements, 173

Shaft (composite), 173
Shear
  debonding, 23
  lag analysis, 46
  testing, 251
Short-fibre composites, 45
Silane coatings, 24, 140
Specific energy absorption, 221
Steel fasteners (pull-out), 279
Stick–slip phenomena, 8
Stress
  analysis (shear test), 251
  corrosion (GRP), 193
  tensor criterion, 269

Transverse ply cracks, 33

Von Mises–Hill criterion, 270

Composites Science and Technology **28** (1987) 320–321

CONTENTS OF VOLUME 28

Number 1

Rate-Dependent Mode I Interlaminar Crack Growth Mechanisms in Graphite/Epoxy and Graphite/PEEK 1
J. W. GILLESPIE Jr, L. A. CARLSSON and A. J. SMILEY (USA)

A Microbond Method for Determination of the Shear Strength of a Fiber/Resin Interface 17
BERNARD MILLER, PIERRE MURI and LUDWIG REBENFELD (USA)

The Effect of Interlaminar Fracture Properties on the Delamination Buckling of Composite Laminates 33
STEVEN L. DONALDSON (USA)

Interfacial Shear Stress in a Short Glass Fibre-Reinforced Polypropylene Sheet . 45
V. B. GUPTA, R. K. MITTAL, P. SHARMA and B. S. GUPTA (India)

Simple Design for Reliable High-Performance Laminates 57
A. M. SPENCER (Australia)

Book Reviews 79

Conference Diary 83

Number 2

Analysis of Progressive Failure in Composites 87
OZDEN O. OCHOA and JOHN J. ENGBLOM (USA)

Damage in Composites—Modeling of Imperfect Bonding 103
JACOB ABOUDI (Israel)

Adhesion between Rayon and Nylon Cord and an Elastomer Matrix . . . 129
S. BANERJEE and C. K. DAS (India)

The Effect of the Fiber/Matrix Interface on the Flexural Fatigue Performance of Unidirectional Fiberglass Composites 137
G. C. SHIH and L. J. EBERT (USA)

Book Reviews 163

Conference Diary 169

Composites Science and Technology (**28**) (1987)—© Elsevier Applied Science Publishers Ltd, England, 1987. Printed in Great Britain

Number 3

Young's Modulus and Shear Modulus of a Composite Shaft from Resonance Measurements 173
A. SPENCER (Australia)

Effect of Matrix Toughness on Crack Propagation during Stress Corrosion of Glass Reinforced Composites 193
J. N. PRICE and D. HULL (England)

Axial Crushing of Glass Fibre–Polyester Composite Cones 211
J. N. PRICE and D. HULL (England)

Bending of Simply-supported, Antisymmetrically Laminated Rectangular Plate under Transverse Loading 231
J. G. REN (CHINA)

Conference Report 245

Conference Diary 247

Number 4

Theoretical and Experimental Evaluation of the Iosipescu Shear Test . . 251
J. A. BARNES, M. KUMOSA and D. HULL (UK)

On Phenomenological Anisotropic Failure Criteria 269
WEI-XUN FAN (People's Republic of China)

Pull-out Steel Fasteners from a Laminated Composite Subjected to External Pressure 279
T. V. PARRY, J. M. WILSON and D. C. LECK (UK)

The Flexural Behaviour of Aramid Fibre Hybrid Composite Materials . . 291
S. FISCHER and G. MAROM (Israel)

Conference Dairy 315

Subject Index 318

Contents of Volume 28 320

Contents of Composite Structures

As a service to readers, the contents list of the current issue of this sister journal is reproduced here.

Volume 7, Number 2

Delamination Buckling of Cylindrical Shells under Axial Compression 83
S. SALLAM and G. J. SIMITSES (USA)

On Buckling of Orthotropic Compressed Plates with Circular Holes 103
PER-LENNART LARSSON (Sweden)

Free Vibration of Specially Orthotropic, Multilayered, Thin Cylindrical Shells with Various End Conditions 123
C. B. SHARMA and M. DARVIZEH (UK)

Analysis of a Buffer Strip Laminate with Fiber and Matrix Damage and Interlaminar Debonding 139
L. R. DHARANI and C. P. SEATON (USA)

Book Review
Developments in Reinforced Plastics—5. Edited by G. Pritchard, Elsevier Applied Science Publishers, London, 1986. 159
(Reviewed by I. H. Marshall)

Composites Science and Technology **(28)** (1987)—© Elsevier Applied Science Publishers Ltd, England, 1987. Printed in Great Britain
